## Box Sealing Tape

### 370

**Product Description** Scotch Tape 370 is a general purpose box sealing tape with a biaxial orientated polypropylene film backing and hot melt solvent free (synthetic rubber resin) adhesive. The ScotchPro™ polypropylene backing is edge tear and split, abrasion and moisture resistant; and provides a seal against dust and contaminants. The adhesive is specifically formulated to provide good adhesion to fibreboard

Product Construction	Backing	Adhesive	Color
	Biaxially oriented polypropylene film	Synthetic Rubber Resin (Hot Melt)	Transparent, white, buff/tan/brown

**Typical Physical Properties**

**Note:** The following technical information and data should be considered representative or typical only, and should not be used for specification purposes.

		ASTM Test Method
Adhesion to Stainless Steel	4,0 N/cm	AFERA 5001
Tensile Strength	50 N/cm	AFERA 5004
Elongation at Break	140 %	AFERA 5004
Total Thickness	0.045 mm	AFERA 5006
Static Shear	2000+ minutes	AFERA 5012

**Features** Best applied at room temperature onto a clean, dry, dust-free fibreboard surface. Once applied the product performs well throughout all temperatures typically encountered by packaged products in shipping and storage environments – including deep-freeze.

**Storage Condition** Store in clean dry place. Temperature of 21 °C and 50 % relative humidity are recommended.

**Shelf life** Scotch 370 has a shelf life of 12 months from date of dispatch by 3M.

**Precautionary Information** Refer to product label and Material Safety Data Sheet for health and safety information before using the product. For information please contact your local 3M Office. [www.3M.com](http://www.3M.com)

**For Additional Information** To request additional product information see address below.

**Important Notice** All statements, technical information and recommendations contained in this document are based upon tests or experience that 3M believes are reliable. However, many factors beyond 3M's control can affect the use and performance of a 3M product in a particular application, including the conditions under which the product is used and the time and environmental conditions in which the product is expected to perform. Since these factors are uniquely within the user's knowledge and control, it is essential that the user evaluate the 3M product to determine whether it is fit for a particular purpose and suitable for the user's method or application. All questions of liability relating to this product are governed by the terms of the sale subject, where applicable, to the prevailing law.

Values presented have been determined by standard test methods and are average values not to be used for specification purposes. Our recommendations on the use of our products are based on tests believed to be reliable but we would ask that you conduct your own tests to determine their suitability for your applications. This is because 3M cannot accept any
